

# Intelligent **Voice-down** Services

Prevent loitering and deter crime by protecting your facilities' perimeter with autonomous AI-based cameras and voice-downs

## Autonomous Monitoring

Interface will design and deploy our compact perimeter security unit that includes an AI-enabled camera, audio player with speaker, strobe lights, and PLC module designed to accurately detect people or vehicles and issue a series of calibrated voice-down commands to deter crime.

**Autonomous System**

**99.99% Accurate**

**Customizable Escalation Paths**

## Real-Time Detection & Response

Detect people or vehicles in areas that are off limits or after business hours and respond immediately as programmed.

### Integration with Command Center

Escalate persistent threats or serious breaches to live remote monitoring teams at Interface iSOC.

## Calibrated Voicedowns

Use multi-stage pre-recorded messages to issue warnings. Customize messages to suit the context.

## Standalone or Integrated Deployment

Deploy as a standalone intelligent unit with automated voice-downs or as a fully-integrated solution with the Interface iSOC for human intervention after initial warning.

## Tackle a Wide Variety of Security Threats with Confidence

- ✔ Prevent burglaries and vandalism
- ✔ Stop loitering & vagrancy
- ✔ Secure alleyways & less frequented spaces
- ✔ Monitor indoor spaces such as kiosks
- ✔ Customize messages & strobe activations
- ✔ Configure camera detection zones
- ✔ Optimize activation logic based on performance
- ✔ Leverage turnkey deployment & maintenance

# Autonomous Monitoring + Interface Command Center (iSOC) Integration for Comprehensive Threat Coverage

Detect loitering and vagrancy and respond with voice-down commands and strobe lights

Monitor for break-ins and unauthorized presence and respond instantly with optional human intervention

AI-enabled camera detects and tracks dwell time in restricted areas

Play a series of voice-down commands based on dwell detection

Escalate to iSOC for human monitoring and intervention for high-risk threats

Deploy for after-hours monitoring of indoor spaces such as kiosks or storage with high-value goods

Escalate persistent threats to intervention specialists at iSOC who can call law enforcement if needed

## Interface Secures Leading Retail & Restaurant Brands
